Antennae

With black yarn, chain 10. Fasten off, leaving a long end. Take this end and tie a knot very close to the end of the chain. Pull tight and cut yarn close to knot. Carefully take the other end (the one without the knot) and pull it through the head and stuffing. Pull out enough so that it looks like there are 2 antennae sticking out from the bee's head. There are about 3 stitches in between the antennae and they are located right above the eyes.

When you are satisfied with the antennae placement, carefully make a knot close to the opposite end of the chain and cut yarn close.

Wings (make 2)

The wings are made by making a magic ring and working several stitches into the magic ring as follows:

With ivory color yarn, make a magic ring.

R1: Inside the ring, work the following: sc, hdc, dc, 3 tr, dc, hdc, sc. Cut yarn, leaving some length for sewing, using an invisible join, attach the end and start of the wing together. Weave in end to make join secure, then sew the wing onto the top of the body. Repeat for the 2nd wing.
